

## Installation Manual Addendum

# Think NatureWall and for your next retaining wall.

# StoneWall<sup>®</sup> SELECT<sup>®</sup>

Now you don't have to choose between a planted wall and a retaining wall! New NatureWall Clips increase your options to visually soften SRWs, with the strength and easy installation you love in StoneWall SELECT.

### The most versatile SRW in the business!

NatureWall Clips create an automatic setback, exposing hollow cores of blocks for planting. You plant vegetation in rows, pockets or sections—any shape, anywhere—for extra dimension and color. Drip irrigation installs fast and easy in molded slots.

**NatureWall, Section View, Detail**

**Variations in your choice of plants and foliage can produce many effects, from horizontal stripes of color to a complete NatureWall.**

**The StoneWall SELECT System provides the most efficient and elegant solution for creating planted retaining walls.**

The StoneWall SELECT unit provides a groove for installing drip irrigation. The StoneWall SELECT NatureWall Clip provides a 3" planting exposure. And the StoneWall SELECT hollow cores provide plenty of planting soil.

With its ability to form circles, serpentine walls, 90° inside and outside corners, terraces, steps and lighting, the system allows for unlimited creativity in the look of your planted NatureWalls.

**The StoneWall SELECT Standard Clip**

### Instructions:

1. Install filter fabric beneath the planting cores of the blocks, fill the cores with planting soil, wrap fabric around back of blocks and over the top of filled cores as shown in illustration.
  2. Install 1/4" drip irrigation tube in the block cable slot as shown. Place a drip emitter on the tube in each core. Test the system.
  3. Place the NatureWall clips in the slots at the back of the block as shown. Install the next course of StoneWall SELECT units.
  4. Place the plants in the soil-filled cores of the block.
  5. Trim the planting cores with mulch, chips or stones.
- NOTE: See NatureWall Installation Guidelines Addendum for more detailed information.

# A few of the Unlimited NatureWall Variations

The planted wall, made possible by the use of the new **NatureWall Clip**, brings a whole new warmth to an already perfectly proportioned retaining wall system.

**Plan View of StoneWall SELECT retaining wall with NatureWall terraced section in a straight wall, similar to photo above**

*26" Filter Fabric installed beneath planted cores to hold planting soil*

*Continue Filter Fabric behind and above planted cores to segregate soil from the stone backfill*

NatureWall Clips

Standard Clips

**Plan Views of a NatureWall as seen in photo below**

NOTE: Install Standard and NatureWall Clips over the Filter Fabric. Use a utility knife to slit the Fabric.
